

GNSS Software Receiver Engineers

Nottingham Scientific Limited (NSL) is expanding its development and consultancy activities. Applications are invited from suitably qualified candidates to support this next phase of growth. The Company specialises in satellite navigation technologies and their applications related to space, transport and the environment.

We require suitably qualified engineers to support the ongoing development of our GPS/Galileo software receivers. We are looking for people who take pride in their work and can meet deadlines under pressure. Applicants should be self motivated, confident, and with an ambition to succeed as part of a team of highly professional colleagues.

Required Skills

Candidates should have experience of the following:

- Signal Processing (digital, analogue & spread spectrum communications)
- GNSS Baseband Processing
- GNSS Software Development and Integration
- GNSS Receiver Design Principles
- Software Defined Radio Experience
- Embedded software development, including Real-Time systems

Good written and oral communication skills are required, as the role will involve working as part of a team, and the preparation of technical documentation.

Desirable Skills

- Experience of full Hardware development lifecycle
- Use of LINUX and Windows Operating Systems
- Octave and MATLAB expertise
- C and C++ programming experience
